William Bushey

Maker of Software

Minneapolis, MN 55406 (612) 284-5703 wbushey@gmail.com

linkedin.com/in/williambushey

Purpose-driven, hands-on, collaborative software engineer with 15 years of experience building and supporting mission-critical products. Partners with Business, Data, and Operational teams to shape roadmaps and design large-scale systems.

Skills and Technologies

- **Architecture & Leadership:** software architecture, distributed and event-driven systems, domain-driven design, API design, technical leadership and mentoring, product partnership
- **Security & Compliance:** FedRAMP, GDPR, product security and privacy
- **Languages & Frameworks:** Java, Spring Boot, Kotlin, Ruby on Rails, Python, JavaScript, React
- **Data & Messaging:** Kafka, PostgreSQL, Oracle, Redis, ActiveMQ, AWS S3
- **Cloud & Infrastructure:** AWS (Lambda, EKS, Aurora, API Gateway, Transfer Family, DMS), Docker, Kubernetes, Rancher
- **Practices & Tools:** AI Assisted Design and Development, Test Driven Development, CI/CD, Jira, Confluence

Experience

2022-03 - Current

Software Architect

Granicus, Saint Paul, MN

- Technical lead for an enterprise digital communications platform managing 300+ million subscriptions, delivering 24+ billion communications annually, and reporting insights from 100+ TB of data.
- Led multi-team cloud-hosted rewrite of the core messaging platform; owned service domain boundaries and API contracts for an event-driven, domain-driven architecture with an API-first React UI. Delivered a working MVP with subscriber import and bulletin sending in 3 months.
- Designed the architecture for a bot-activity detection service with data scientists; bounded compute cost by running detection on a small set of canary customers whose findings feed a shared IP filter list for all customers. In production for over a year, it cut reported clicks by 50%, all attributable to bot activity, giving customers more trustworthy reports and better data for communication strategy.
- Led urgent, surgical removal of 10 TB of 5+ year old data over roughly 6 months with DBA, with no downtime, from a core database projected to fill during the peak season of the platform's largest customer; prevented a platform-wide outage of a multi-million-dollar line of business. Worked with Product to identify and communicate customer impact.
- Principal technical partner to Product and Security: clarifying ambiguity, identifying trade-offs, and driving adherence to national and international security and privacy compliance programs, including FedRAMP and GDPR.
- Mentor supporting engineer development and psychological safety across 4 development teams.

2019-03 - 2022-03

Senior Software Engineer

Granicus, Saint Paul, MN

- Lead Engineer on greenfield Product Integration platform.
- Veteran maintainer of communications products sending an average of 1 billion emails per month.
- Team Lead on several scrum teams, with focus on establishing a team culture of collaboration, curiosity, and psychological safety.

2014-08 - 2019-03

Software Engineer

Granicus, Saint Paul, MN

- Individual contributor on team developing and maintaining messaging APIs, survey platform, and CRM data sync product.
- Full stack development covering React SPA UIs, Ruby on Rails web applications, Java backends, Postgres and Oracle databases.

2014-02 - 2022-04

Board Member

Minnesota Coalition on Government Information, St. Paul, MN

- Eight years on the board of a nonprofit providing public education on government transparency and government information policy.

2012-10 - 2016-12

Co-Founder

Open Twin Cities, Minneapolis, MN

- Established Code for America Brigade of 500+ members.
- Advocated for Minneapolis Open Data Policy.
- Led event and relationship development with city, county, and state partners.

2012-08 - 2014-08

Technology Coordinator

E-Democracy.org, Minneapolis, MN

- Sole in-house software developer for an online discussion platform serving three dozen neighborhoods.
- Led implementation of UI redesign.
- Primary point of contact for internal and external technical projects and discussions.

Education

2009-08 - 2011-08

Master of Science: Science, Technology, and Environmental Policy

University of Minnesota - Twin Cities - Minneapolis, MN

- Completed thesis on Online Consumer Privacy.
- Technology Officer of the Public Affairs Student Association; member of the Office of Information Technology Student Advisory Board.
- Course work covered decision making, communication, law, and statistics.

2004-08 - 2008-05

Bachelor of Science: Computer Science

Clarkson University - Potsdam, NY

- Minor in Mathematics; research concentration with a senior thesis on AI planning agents.
- Phi Kappa Phi, ACM, Pi Mu Epsilon.
